

SKETCH 2

The second sketch layout explores **re-use of the existing farm gate** entrance along Antron Hill.

This option is considered favourable as the access point already exists, provides **good forward visibility**, and **avoids placing additional pressure** on the Quarry track junction.

KEY:

- ① Existing entry car park - permeable grass surface
- ② Pavilion / shelter - see board 8 for further thoughts
- ③ Growing space - composting, rainwater harvesting
- ④ Orchard - Cornish varieties of pear, apple, plum & cherry trees
- ⑤ Seating / performance space
- ⑥ New tree planting - 2000 trees secured via funding
- ⑦ Integrated informal play within trees
- ⑧ Formal play & fitness within vegetation boundary
- ⑨ Wildflower meadow & grassland habitat
- ⑩ Looped pathways
- ⑪ Sustainable drainage & wetland habitat creation
